

AgelessLabs.ai — Project README

This folder contains all working files for the AgelessLabs.ai project. Start here when resuming work with your AI developer (Claude).

How to Resume Development

1. Open a new Claude conversation at claude.ai
2. Upload the file(s) you want to work on
3. Paste this prompt to get Claude up to speed:

"I'm building AgelessLabs.ai — a longevity content site with an AI biomarker interpreter tool. We're monetizing through lab testing affiliates (InsideTracker, Function Health, Ulta Lab Tests) and a \$19 paid report upgrade. You are my developer. Here are the current project files. Please review them and let's continue building."

Project Files

AgelessLabs-Project-Plan.md

The full business plan. Covers the business model, 5 build phases, content strategy, affiliate targets, revenue projections, and immediate next steps. Update this as the project evolves.

longevity-tool.html

The core product. A working AI Biomarker Interpreter prototype. User pastes lab results, Claude API analyzes them and returns a longevity score, per-marker breakdown, and recommendations. Ends with a \$19 upsell CTA for the full report. Uses the Claude API — needs an API key wired in for production. **Status:** Prototype — needs AgelessLabs branding applied, paid tier built out, and Stripe integrated.

domain-generator.html

A utility tool for generating domain name ideas. Pre-loaded with AgelessLabs project context. Supports .com, .ai, .health, and .co TLDs. Each generated name links directly to Namecheap and GoDaddy for availability checking. Uses the Claude API. **Status:** Complete

utility — not part of the live site.

Project Status

Item	Status
Domain (AgelessLabs.ai)	To register
Domain (AgelessLabs.com)	To register (redirect)
Social handles (@agelesslabs)	To secure
Trademark check	To complete at USPTO.gov
Hosting	To set up
AI tool — free tier	Prototype complete
AI tool — paid tier (\$19)	Not started
Stripe integration	Not started
Site design & branding	Not started
Affiliate applications	Not started
Content strategy	Planned — not started
First content pieces	Not started

Key Decisions Made

- **Domain:** AgelessLabs.ai (primary), AgelessLabs.com (redirect)
- **Niche:** General longevity / anti-aging
- **Primary affiliate category:** Lab testing & diagnostics
- **Core tool:** AI Biomarker Interpreter (free tier + \$19 paid report)
- **Brand tone:** Clinical, credible, aspirational — not wellness-fluffy
- **Brand aesthetic:** Deep green, cream, Cormorant Garamond typography

- **Target audience:** Health-conscious adults 35–65, affluent, biohacking-adjacent
- **Tech stack:** HTML/CSS/JS frontend, Claude API, Stripe for payments

Affiliate Programs to Apply To

- InsideTracker — insidetracker.com/affiliates
 - Function Health — functionhealth.com
 - Ultra Lab Tests — ultalabtests.com/affiliate
 - Life Extension — lifeextension.com/affiliates
 - Marek Health — marekhealth.com
-

Next Build Priorities

1. Apply AgelessLabs branding to the AI tool (logo, colors, final UI)
 2. Build the full site structure (home, about, tool, blog template)
 3. Build the paid report tier with Stripe
 4. Build email capture component
 5. Create first 3 cornerstone content pages
-
